SUMMARY

A motivated computer science engineering student with a deep passion for software development and a strong interest in AI. Committed to delivering meaningful results while continuously enhancing skills, with a focus on applying knowledge in real-world scenarios. Enthusiastic about contributing to innovative projects and advancing in the tech industry, particularly with a focus on Java.

EDUCATION

B.E in Computer Science and Engineering Jyothy Institute of Technology, affiliated to Visvesvaraya Technological University (VTU)-Belagavi	GPA – 8.77	2022-2026
--	-------------------	------------------

TECHNICAL SKILLS

Programming Languages: Java , HTML, CSS , SQL , JavaScript , React.js

Operating Systems: Windows, Ubuntu

AI/ML Tools: Stream-lit

ACADEMIC PROJECTS

Personalized Leisure Hub: A Unified Platform for Personalized Entertainment Recommendation

- Developed a Personalized Leisure Hub integrating movies, music, and OTT content into a unified platform with intelligent recommendations using ALS-based collaborative filtering and user interaction data stored in MongoDB.
- Built a seamless Flutter frontend and Node.js/Express backend with TMDB integration, enabling personalized discovery, reviews, and content filtering across genres and languages.

Plant Disease Detection AI

- Created an AI system to identify plant diseases from leaf images using CNN and TensorFlow.
- Processed image data and deployed the model with Streamlit for disease classification.
- Optimized the model to achieve high accuracy in detecting plant diseases.

INTERNSHIP EXPERIENCE

Full Stack Developer Intern – SuprMentr

- Developed responsive web applications using React.js, Node.js, Express.js, and MongoDB.
- Developed a full-stack real-time chat application enabling instant messaging with features like user authentication, one-to-one messaging, typing indicators, and online user tracking using Socket.IO.
- Designed a responsive WhatsApp-inspired UI using React, featuring message status indicators (sent, delivered, seen), timestamps, and a modern chat interface.
- Built a scalable backend using Node.js and Express with REST APIs for authentication and messaging, deployed on Render with a React frontend hosted on Vercel.

OTHER ACTIVITIES

- Took part in JIT Hack 2022 and 2024, a hackathon organized by JIT.
- Participated in Gameathon 5.0 and 6.0, organized by JIT.
- Participated in Enigma 2024 organized by JIT for the Stock Market Predictor .
- Completed a web development course covering HTML, CSS, and JavaScript with hands-on experience building websites and web applications.
- Google cloud computing foundations program : Completed training on cloud infrastructure, networking, data, ML, and AI with hands-on labs in Google cloud.
- Attended National Conference on Advances in Science ,technology ,engineering and management(NCASTEM -2025)
